**RT** Revenue Tons which is equal to the figure of the weight in metric tons and/or of the volume in cubic meter divided by 2 whichever is the greater/ higher.

The unit of weight used to calculate the charge for loading and unloading goods in and out of the warehouse is RT (tons of exchange) with the following conversion rate:

- For light cargo (i.e. cargo with a volume ratio (m3) on a weight (actual ton) greater than or equal to 2), then convert 01 RT = 02m3 of actual goods recorded on export/import documents.

- For heavy goods (i.e. cargo with a volume ratio (m3) on a small (actual ton) weight more than 2), then convert 01 RT = 01 ton of actual goods recorded on export/import documents.
